

Coachella Valley Regional Stormwater Project Updates

- CVWD is currently seeking proposals from contractors for the project with a tentative construction start time at the end of August 2021.
- The duration of the construction is estimated take 12 to 18 months.

Design and Installation of Northern Pond and Landscape

- CVWD will coordinate with SCSH on the design of the replacement pond and surrounding landscape.
- The Northern Pond will be enlarged to accommodate the location of the inflow from the storm drains.

Security of the Construction Site and North Channel

- CVWD will coordinate with SCSH to provide 24 hours security services of the construction site to prevent outside access through the storm drains during construction and after project completion.
